

If you could really fix our broken health care system, would you call your Congressperson?

This September, Rep. Anthony Weiner (D-NY) will introduce a bill (HR 676) for health care reform based on the only plan that works for all seniors in America - MEDICARE.

Except this time, let's make Medicare better!

Make it Medicare for All!

The Democratic Congress is still debating their bill (HR 3200), but it is well over 1,000 pages and very complicated. It will still leave the for-profit, private health insurance companies in charge, and Americans will still pay the highest prices for health care and drugs in the world. We can, we must do better!
